

EUROPEAN STUDBOOK FOR ASIAN ELEPHANTS (*Elephas maximus*)

REGISTER OF ASIAN ELEPHANTS LIVING IN EUROPE AS OF 1 JANUARY 2015

**BOTH THOSE MANAGED IN EEP
AS ZOO-ANIMALS NOT KEPT IN INSTITUTIONS PARTICIPATING IN THE EEP**

PLUS OVERVIEW OF DEVELOPMENTS DURING 2014

EEP coordinator: Martin van Wees (m.van.wees@rotterdamzoo.nl)
Studbook keeper: Marc Damen (m.damen@rotterdamzoo.nl)

ROTTERDAM, NL, 3 January 2015

Dear participants in the Asian Elephant EEP, dear EAZA Elephant TAG Members

With pleasure we present you an update to the EAZA Asian Elephant EEP Studbook, updated till 1 January 2015. As always a SPARKS dataset for your own analysis is available upon your request.

During 2014 we noticed 13 (6.7) births within the EEP, all of which survived! Although all births are equally welcomed, especially the birth of a female cow in Woburn is from a genetical point of view an important addition to the EEP, as she is the first surviving offspring of a female imported from Asia, and that female is reaching the end of her reproductive life-span.

Twenty-one (13.8) elephants were transferred within the EEP and five (1.4) elephants died in the EEP, plus two (0.2) outside the EEP. There were quite some transfers with non-EAZA participants. The most noteworthy event was the addition of the elephants of Berlin Zoo and Tierpark into the EEP, as a result of a formal letter written by the new director of both institutions, in which he declared to participate in this EEP. By means of this no less than 16 (4.12) elephants could be formally included in the EEP. In the meantime already two of them have been moved within the EEP.

As of 1 January 2015 the EEP population comprises 298 (84.214) elephants in 72 institutions. This was 277 (75.202) in 70 institutions at the beginning of 2014. Veszprem/HU is a new participant and started with a group of three males.

The population of Elephants kept in Europe NOT in EEP participating institutions decreased from 66 (13.52) in 28 institutions till 50 (9.41) in 25 institutions; Mallorca is new to his group (they received two post-reproductive cows), while Berlin Tierpark, Berlin Zoo, Napoli Zoo and Walding Zoo have left this group for various reasons.

At the moment there are 22 pending recommendations, comprising 15.7 elephants from 12 institutions to 15 other institutions. Attica will be the next new participant and start with a bachelor group. Nikolayev will receive a genetical important male. Katowice will send their last elephant to Rapperswill in 2015 and receive young bulls in 2016. Please carry out the recommended transfers as soon as possible and report the EEP coordinator and/or Studbook keeper about this. In case of questions or disagreement of a recommendation, please contact the EEP Coordinator.

When looking at the development of the EEP population over the past years, we really can say that this is a successful elephant breeding programme. We all can be proud on that. When looking at for example the Asian elephant SSP, we can see that the success of our joint breeding programme is exceptional. For the year 2015 we expect at least 9 births. We want to express our sincere appreciation for the close cooperation with all participants.

Best regards,

Martin van Wees, EEP Coordinator for Asian elephants (m.van.wees@rotterdamzoo.nl)
Marc Damen, Studbook keeper for the Asian elephant EEP (m.damen@rotterdamzoo.nl)

Cover picture: In Dublin Zoo no less than three (2.1) Asian elephants were born within two months time. All are being healthy and reared within the family group. Picture courtesy of Dublin Zoo.

Clarification to the studbook:

For each institution the composition of the herd present at the institution is given.

The 29 most genetical important animals in the EEP and another 12 outside the EEP are marked in blue.
